OMNITEK ENGINEERING CORPORATION REPORTS FIRST QUARTER RESULTS
--Anticipates Demand for Diesel Engine to Natural Gas Conversions to Gain Momentum--

SAN MARCOS, CA — May 14, 2009 — Omnitek Engineering Corporation (OTC: OMTK.PK) today reported results for its first quarter ended March 31, 2009, with revenues impacted by the timing of customer order shipments for its diesel-to-natural gas conversion systems until after the quarter end.

Net revenues for the fiscal first quarter were $211,357 compared with $537,176 a year earlier. For the same period, the company reported a net loss of $156,891 or $0.01 per share, compared with a net loss of $172,875, $0.01 per share, a year ago.

Gross profit for the three months ended March 31, 2009 was $81,327 compared with $185,241 a year ago, due primarily to decreased sales. Gross profit for the three-month period as a percentage of sales was 38 percent compared with 34 percent in the same period a year ago.

“Notwithstanding the results for the quarter, which were impacted by the timing of customer order shipments rather than a precipitous decline in global demand for converting high-polluting diesel powered engines to operate on natural gas, we anticipate strong sales for the balance of 2009,” said Werner Funk, president and chief executive officer of Omnitek Engineering Corporation.

He highlighted two recently announced agreements concerning initial conversion orders for fleets in Peru and Bulgaria to support management’s growth expectations for the year. Both projects in Peru and Bulgaria commenced in May.

Funk indicated that a project to convert diesel powered irrigation pumps in central California is expected to commence within the next 30 days.

About Omnitek Engineering Corporation

Omnitek Engineering, Corp. develops and sells new natural gas engines, as well as proprietary diesel-to-natural gas conversion systems -- providing global customers with innovative alternative energy and emissions control solutions that are sustainable, affordable and designed to combat global warming.

Some of the statements contained in this news release discuss future expectations, contain projections of results of operations or financial condition or state other "forward-looking" information. These statements are subject to known and unknown risks, uncertainties, and other factors that could cause the actual results to differ materially from those contemplated by the statements. The forward-looking information is based on various factors and is derived using numerous assumptions. Important factors that may cause actual results to differ from projections include, among many others, the ability of the Company to raise sufficient capital to meet operating requirements, completion of R&D and successful commercialization of products/services, patent completion, prosecution and defense against well-capitalized competitors. These are serious risks and there is no assurance that our forward-looking statements will occur or prove to be accurate. Words such as "anticipates," "expects," "intends," "plans," "believes," "seeks," "estimates," and variations of such words and similar expressions are intended to identify such forward-looking statements.
